

SOLVING THE MOST DIFFICULT PACKAGING CHALLENGES

The Clamco 1700 Series high speed F/F/S Wrappers provide the ability to wrap a wide variety of goods at speeds up to 120 packages per minute without operator assistance. The 1700 Series provides the ultimate in reliability, user friendliness, and easy changeover, coupled with the highest quality components, and completely built in the U.S.A. These high speed automatic F/F/S wrappers are in place across the U.S. from Fortune 500 companies to small independent manufacturers, making money, and solving the most difficult packaging challenges.

Standard Features on 17-120 Wrapper only:

All of the above standard features, plus:
17" wide by 6" high end seal knife system
Up to 120 cycles per minute

Model 7221 Production Shrink Tunnel

1700 SERIES

HORIZONTAL FORM/FILL/SEAL WRAPPERS

Distributor:

All 1700 Series Wrappers:

Standard Features:

- Patented shrink film wrapping machine
- Patented rotary hot knife side seal attachment
- PLC controls
- Touch screen operator interface for all machine controls
- Variable speed infeed systems
- Variable speed, Venturi vacuum belt
- Variable speed cast steel seal knife seals most polyolefin, polyethylene, and PVC films
- Pin perforator system
- Obstruction detectors on end seal system
- Fully enclosed end seal system with E-stop
- Quickly adjustable seal centering system
- One year limited warranty

Standard Controls on Touch Screen:

- All product set-up features (ie - product length, speed, etc.)
- Fault troubleshooting ability
- Hot knife temperature set point and independent feedback
- Infeed, vacuum belt, and end seal motor speeds, counter

Standard Features on Model 17-80S Wrapper only:

- All of the above standard features, plus:
- 17" wide by 6" high end seal knife system
- Up to 80 cycles per minute
- Patented continuous motion, rotary hot knife system that seals most polyolefin films
- Eight foot infeed conveyor
- Crank adjustable inverting head
- Crank adjustable side seal for quick product changeover
- Scrap film take up wheel

Standard Features on Model 17-80 Wrapper only:

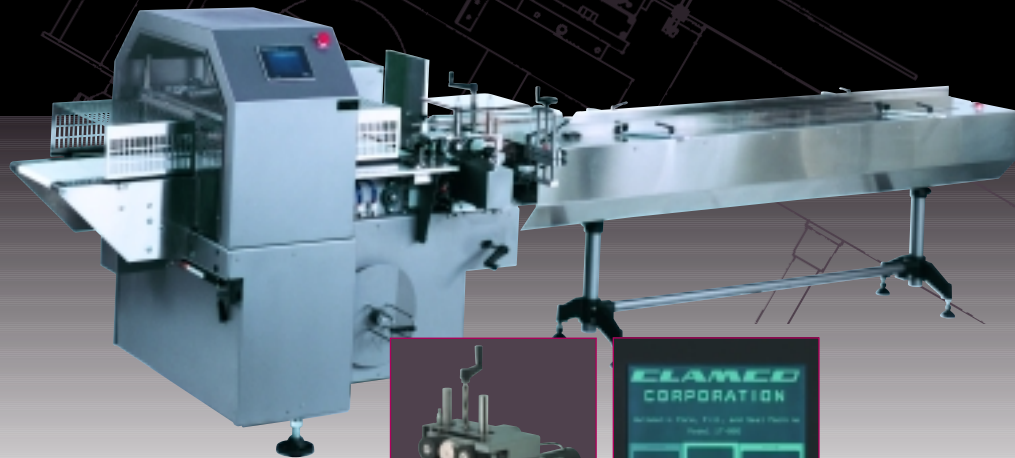

- All of the above standard features, plus:
- 17" wide by 6" high end seal knife system
- Up to 80 cycles per minute
- Static Seal System with appropriate film forming plow
- Four foot infeed conveyor

Standard Features on Model 17-120S Wrapper only:

- All of the above standard features, plus:
- 17" wide by 6" high end seal knife system
- Up to 120 cycles per minute
- Patented continuous motion, rotary hot knife system that seals most polyolefin films
- Eight foot infeed conveyor
- Crank adjustable inverting head
- Crank adjustable side seal for quick product changeover
- Scrap film take up wheel

1700 SERIES HORIZONTAL FORM/FILL/SEAL WRAPPERS

The low-cost, high-speed shrink wrap alternative! Clamco's patented shrink film wrapping 1700 System features a rotary hot knife side seal attachment, production speeds up to 120 packages per minute, a maximum seal width of 17 inches, easy touch screen operation and much more. Combined with our rugged 860 Heat Shrink Tunnel, this system gives you high speeds at less cost.

1700 Series patented side seal assembly/mechanism

1700 Series touch screen control panel
